EPA Approval of HiTEC 3000

Dear Sirs:

On behalf of the American Council on Science and Health, a scientific group advised and directed by over 200 scientists and physicians, I am writing to urge the EPA to approve the HiTEC 3000 gasoline additive. This additive will reduce automobile emissions, eliminate benzene and formaldehyde levels in gasoline, boost octane levels, and assist in providing an improved environment.

This additive contains manganese, a naturally occurring element. It has been successfully used in Canadian automobiles for more than 13 years and over 400 billions of driving.

The additive has undergone the most testing of any additive and offers many significant benefits.

Board of Directors

Sidney Shindell, M.D., LL.B.
Chairman of the Board, ACSH
Professor and Chairman
Department of Preventive Medicine
Medical College of Wisconsin

Elizabeth M. Whelan, Sc.D., M.P.H.

Harvard School of Public Health

Stephen S. Sternberg, M.D.
Member, Sloan-Kettering Institute
for Cancer Research

There is a clear scientific consensus that this additive poses no threat to human health.

We urge the EPA to approve the use of this additive.

Sincerely,

A handwritten signature in cursive script, reading "Edward G. Remmers". The signature is fluid and extends across the width of the text area.

Edward G. Remmers, Sc. D.
Vice President
